

Hughie's Audio-Visual Leading the way for the audio-visual industry

What began at a little shop called Hughie's Flowers & Film Service in Cleveland some 53 years ago was an idea that the city's convention holders would need a method to capture all that went on during their citywide events. It was believed that those same individuals would require film and tape recorders to capture the daily events, that they would require slide projectors and screens to show the attendees the activities of the company or organization, and that they would also need meeting related equipment during their shows. As it turned out, they did, and they turned to Hughie's to help them fill those needs.

A lot has changed in the audio-visual business since then, but one thing has not. Convention holders and meeting planners still turn to Hughie's Audio-Visual to provide equipment and peace of mind when staging their shows and events. That's because, since 1953, Hughie's Audio-Visual has been committed to being the one and only source of quality audio-visual equipment in the industry by continually upgrading and purchasing new, technologically advanced equipment. That commitment is evident today with the recent purchase of 65" plasma display panels, intelligent moving lighting fixtures and concert-quality audio systems, just to name a few. This constant upgrading of equipment, along with a sales and technical staff with over 100 years of combined industry related experience, makes Hughie's Audio-Visual a convenient one-stop for live-event design and production.

But, besides having the largest inventory of technologically advanced equipment necessary for today's high-energy productions, Hughie's Audio-Visual can also provide your group, company or organization with the best in convention related services as well. Take for example our Event Registration Services offering your conference and trade show attendees a

quick, friendly and streamlined registration experience like no other. From our customizable software, automated badge printing, booth design and infrared lead retrieval scanning devices, to the various on-line registration options, your show will practically run itself.

Need computers or computer related equipment? Hughie's Audio-Visual has the latest in touch-screen LCD PCs and P4 laptops for your serious computing needs along with the best in laser and inkjet printers. Plus, if you're looking to create a computer network, Hughie's has the network peripherals, cabling and wireless devices to connect from two to 200 PCs.

Did you know that there is more to Hughie's Audio-Visual than just quality rental equipment? Hughie's also boasts a full production assistance department. We'll take your ideas from script to screen to create an experience your attendees will not forget.

Business travelers will also have the opportunity to enjoy the same quality equipment and professional service that you have come to expect from Hughie's, by visiting our offices in Columbus, Pittsburgh and the newest in the Hughie's Audio-Visual brand of companies called HAVP, which are located in various Hilton Garden hotel properties in

Dallas, Missoula, Mont., and Pittsburgh.

With all of our resources, years of knowledge in the industry, and cutting edge technology, you can rely on our team working closely with yours to ensure many successful events.
